

Test Review Committee Active Cases

Test Review Committee (TRC) applications are considered active after the initial application is reviewed by the TRC Triage Team and until a Record of Decision is released by the Ministry of Health. This list includes only those tests that meet the above criteria.

Input related to any test under review by the TRC may be submitted for consideration up to 20 business days after the date of posting. Submissions received after 20 business days may not be received in time for inclusion in the TRC review. Input will be accepted in writing to testreview@phsa.ca.

Test Name	Request	Date of Posting	Stage
Blood film review	Review of blood film review test utilization and expenditure	September 12, 2016	Agency
Newborn screening for severe combined immunodeficiency (SCID), biotinidase (BTN) and carnitine uptake defect (CUD)	Addition of new clinical laboratory tests	September 12, 2016	Ministry
Comprehensive drug analysis (CDA)	Addition of new clinical laboratory test	March 22, 2017	Implementation
Mismatch Repair Panel (MMR)	Addition of new clinical laboratory test	September 7, 2017	Ministry
MLH1 Methylation testing	Addition of new clinical laboratory test	September 7, 2017	Ministry
BRAF Immunohistochemistry	Addition of new clinical laboratory test	September 7, 2017	Ministry
<i>Pneumocystis jirovecii</i> pneumonia PCR	Addition of new clinical laboratory test	September 7, 2017	Ministry
<i>Trichomonas Nucleic Acid Amplification Test</i>	Addition of new clinical laboratory test Removal of existing MSP fee items – 90784 and 90785	October 23, 2017	Implementation
Telomere Length	Addition of new clinical laboratory test	November 20, 2017	Implementation
Thiopurine methyltransferase (TPMT)	Addition of new clinical laboratory test	November 20, 2017	On-hold by applicant
ANCA, LiAA, APCA Review	Review of existing fee items	March 28, 2018	Agency

Congenital CMV PCR	Addition of new clinical laboratory test	April 16, 2018	Ministry
NGS Cardiac Panel	Addition of new clinical laboratory test	April 16, 2018	Agency
Epstein Barr Virus Viral Load	Addition of new clinical laboratory test	April 16, 2018	Agency
Lipid Tests (Cholesterol, HDL, Triglycerides)	Review of existing fee items	June 4, 2018	Agency
Aldosterone, Metanephrines, Catecholamines	Review of existing fee items	June 4, 2018	Agency
MYD88 L256P	Addition of new clinical laboratory test	June 4, 2018	Agency
Fecal Calprotectin	Addition of a new clinical laboratory test	August 24, 2018	Agency
Immunoglobulin Heavy Chain Variable Region Mutational Analysis	Addition of a new clinical laboratory test	August 24, 2018	Agency
Gastrointestinal Pathogen Multiplex Panel Review	Review of provisional fee item	August 28, 2018	Agency
MuSK and VGCC Antibodies Review	Review of provisional fee item	August 28, 2018	Agency
